

CSD027-OBSH

Description: CSD027-OBSH is a 50% active dispersion of p,p'-oxybis (benzenesulphonylhydrazide) in a non-vinyl containing silicone base.

BENEFITS

- Available in almost any pre-form allowing for greater efficiencies in your manufacturing process.
- Easy storage
- Fast and easy cleanup
- Easily incorporated into existing formulations.

APPLICATIONS

- Silicone sponge

CRI-SIL SERVICES

- Custom silicone compounding
- Processing Assistance
- Fast Quoting
- Free Samples

Key Features:

- Eliminates problem of adding loose powder to a two-roll mill.
- Ease of processing.
- Decomposition point of the chemical foaming agent is 307-333°F.

How To Use:

CSD027-OBSH should be added on a two-roll mill prior to curing. The dispersion can be used with as little as 1.0 to 4.0 phr to create closed cell sponge materials. This material can be used alone or in conjunction with CRI-SIL's CSD029-VAZO and CSD028-DNPT.

Storage and Shelf Life:

When stored at or below 32C (90F), this material has a shelf-life of 6 months from the date of manufacture.

Limitations:

This product is neither tested nor represented as suitable for medical or pharmaceutical uses.

Property:

- Classification
- Specific Gravity
- Color
- Polymer Type

Typical Value:

CST - Custom
1.29
Off-White
MQ

Food-Grade Products:

The components of CSD027-OBSH are not listed in 21 CFR 177.2600. This FDA regulation deals with rubber articles intended for repeated use in contact with food. CRI-SIL Silicone Technologies does not recommend this modifier for such applications.

Packaging:

CSD027-OBSH is supplied in 50lb boxes, net weight.

Limited Warranty Information

Please Read Carefully

DISPOSAL

CRI-SIL CSD027-OBSH should be disposed of in accordance with local and federal regulations.

WRITING SPECIFICATIONS

The values listed here are considered "Typical Values" and therefore not intended for use in preparing specifications. Please contact CRI-SIL Silicone Technologies prior to writing specifications on these products.
